IN-CLASS PRACTICE – ECS 1100 – Video Connection Practice

Watch & Give Feedback: Notes Sheet

Fill this in as you watch the sample video. Jot a note in each box the moment you notice something — don't wait until the end.

TODAY'S PROMPT

"Describe a situation where you had to complete a task or project without clear instructions. How did you figure out what to do?"

Watch For — One Box Per Category

1 Response Clarity

Does the response clearly explain the task and what was unclear about it?

2 Problem-Solving

What specific strategy did they use — a question asked, an example found, an assumption tested?

3 Deciding Under Uncertainty

How did they decide what to do, and how did they check they were on track?

4 Outcome

Did the approach work? What actually happened?

5 Self-Reflection / Growth

What did they say they learned, or would do differently?

6 Verbal Presentation

Eye contact with the camera? Filler words ("um," "like")?

Now Write Your Feedback

Using your notes, write the feedback you'd actually give this person. Name one thing that worked, and one specific, concrete suggestion for what to improve.

What worked

One specific way to improve

This is exactly what you'll do for real, five times this semester — just with a classmate's video instead of this practice one.
